

Industrial Repair Service

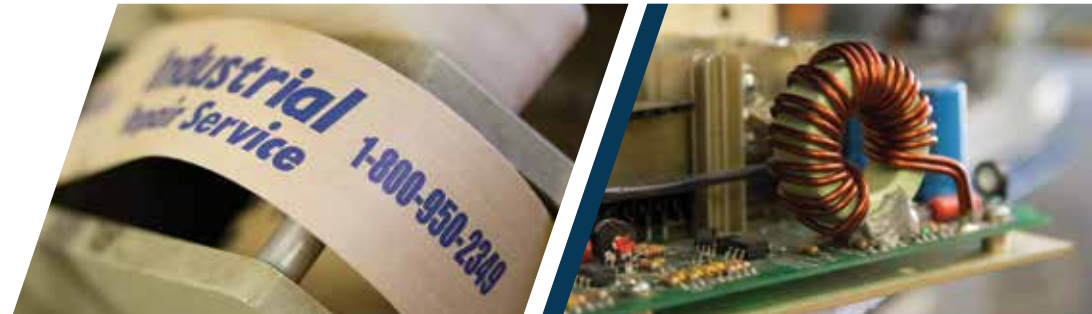

YOUR LEADER FOR
INDUSTRIAL AUTOMATION REPAIRS

WHO WE ARE

Since 1990, Industrial Repair Service has been servicing industrial electronics and automation equipment for manufacturing plants nationwide. Our mission is to help keep manufacturing lines running smoothly with our experienced bench technicians and fast turn-around times.

WHAT WE DO

Our capabilities extend to various industries such as food processing, plastics, steel, textiles, paper, printing, automotive, glass, furniture, wood, tobacco, metal, wind power, rubber, leather, chemicals, refineries, and water treatment facilities.

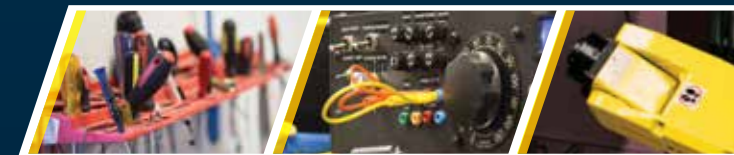

OUR EXPERTISE

Our team services an extensive range of equipment. For a complete listing of manufacturers, please visit our website at www.industrialrepair.net

- AC Drives
- Card Racks
- Chart Recorders
- Circuit Boards
- Circuit Breakers
- Clutch Controls
- Controllers
- Control Modules
- Counters
- DC Drives
- Displays
- Eddy Current Drives
- Encoders
- Flame Controls
- Flow Controllers
- Gearboxes
- HMI's
- Industrial Computers
- Industrial Keyboards
- Industrial Printers
- Industrial Pumps
- Input Cards
- I/O Cards
- Level Controllers
- Light Curtains
- Logic Modules
- Megohmmeters
- Metal Detectors
- Meters
- Monitors
- Multimeters
- Operator Stations
- Oscilloscopes
- Output Cards
- Power Supplies
- PLC's
- Pressure Controllers
- Processor Cards
- Resolvers
- Servo Motors
- Servo Amplifiers
- Servo Drives
- Scales
- Scanners
- SCR Stacks
- Sensors
- Signal Conditioners
- Soft Starts
- Spindle Drives
- Spindle Motors
- Stepper Drives
- Tachometers
- Teach Pendants
- Temperature Controllers
- Timers
- Touchscreens
- Transducers
- Transmitters
- Ultrasonic Controllers
- Valves

18 MONTH IN-SERVICE WARRANTY

WARRANTY

We stand by the commitment to provide value to our customers. We offer an 18 month in-service warranty that starts when the part is installed in your machine and not when it is shipped back to you. We are providing our customers with the peace of mind that the part will work as intended when they need it. In addition, the warranty covers the entire unit and not just the parts we replaced.

SERVICES

Industrial Repair Service offers the best service in the industry. You can count on our technicians to get your equipment up and running as quickly as possible.

FREE FLAT-RATE QUOTES

AVERAGE TURNAROUND 7-10 WORKING DAYS

24-48 HOUR RUSH AVAILABLE

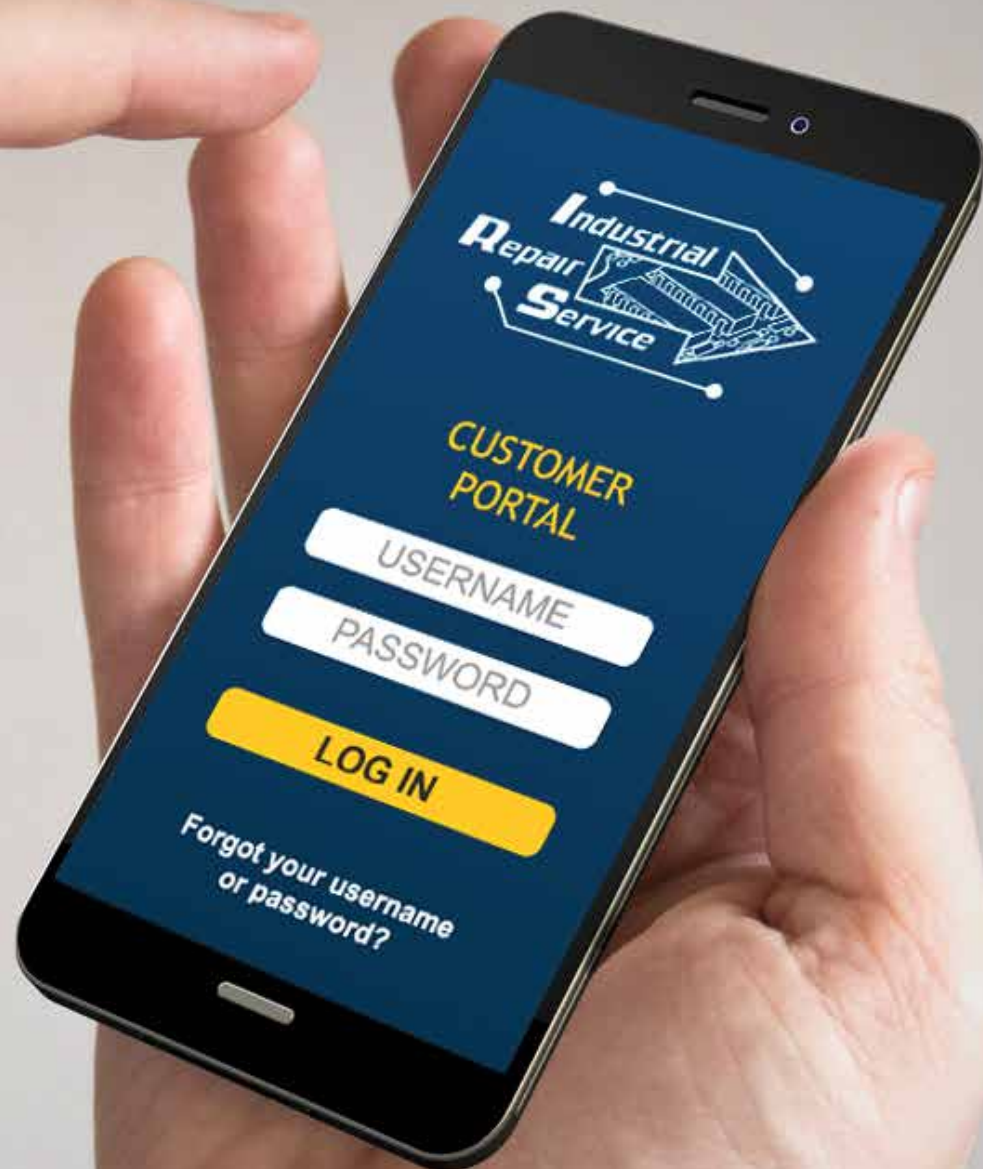

EXCEPTIONAL CUSTOMER SERVICE

EMERGENCY AND ON-SITE FIELD CAPABILITIES (WHERE APPLICABLE)

CUSTOMER PORTAL

With the development of our Customer Portal we've given our clients the access to track their job through the entire repair process.

- View repair history, test reports and completed repairs
- Receive automatic status update notifications
- View tracking numbers for items that have shipped
- Contact your Account Manager or Customer Service department
- Approve jobs

A yellow industrial robotic arm is shown against a dark blue background. The arm is positioned diagonally, with its end effector pointing towards the top left. It features a red emergency stop button on the upper section and a yellow warning label with a triangle and exclamation mark on the lower section. The text 'J3' and 'J2' are visible on the arm's joints.

SERVO SYSTEM TESTING

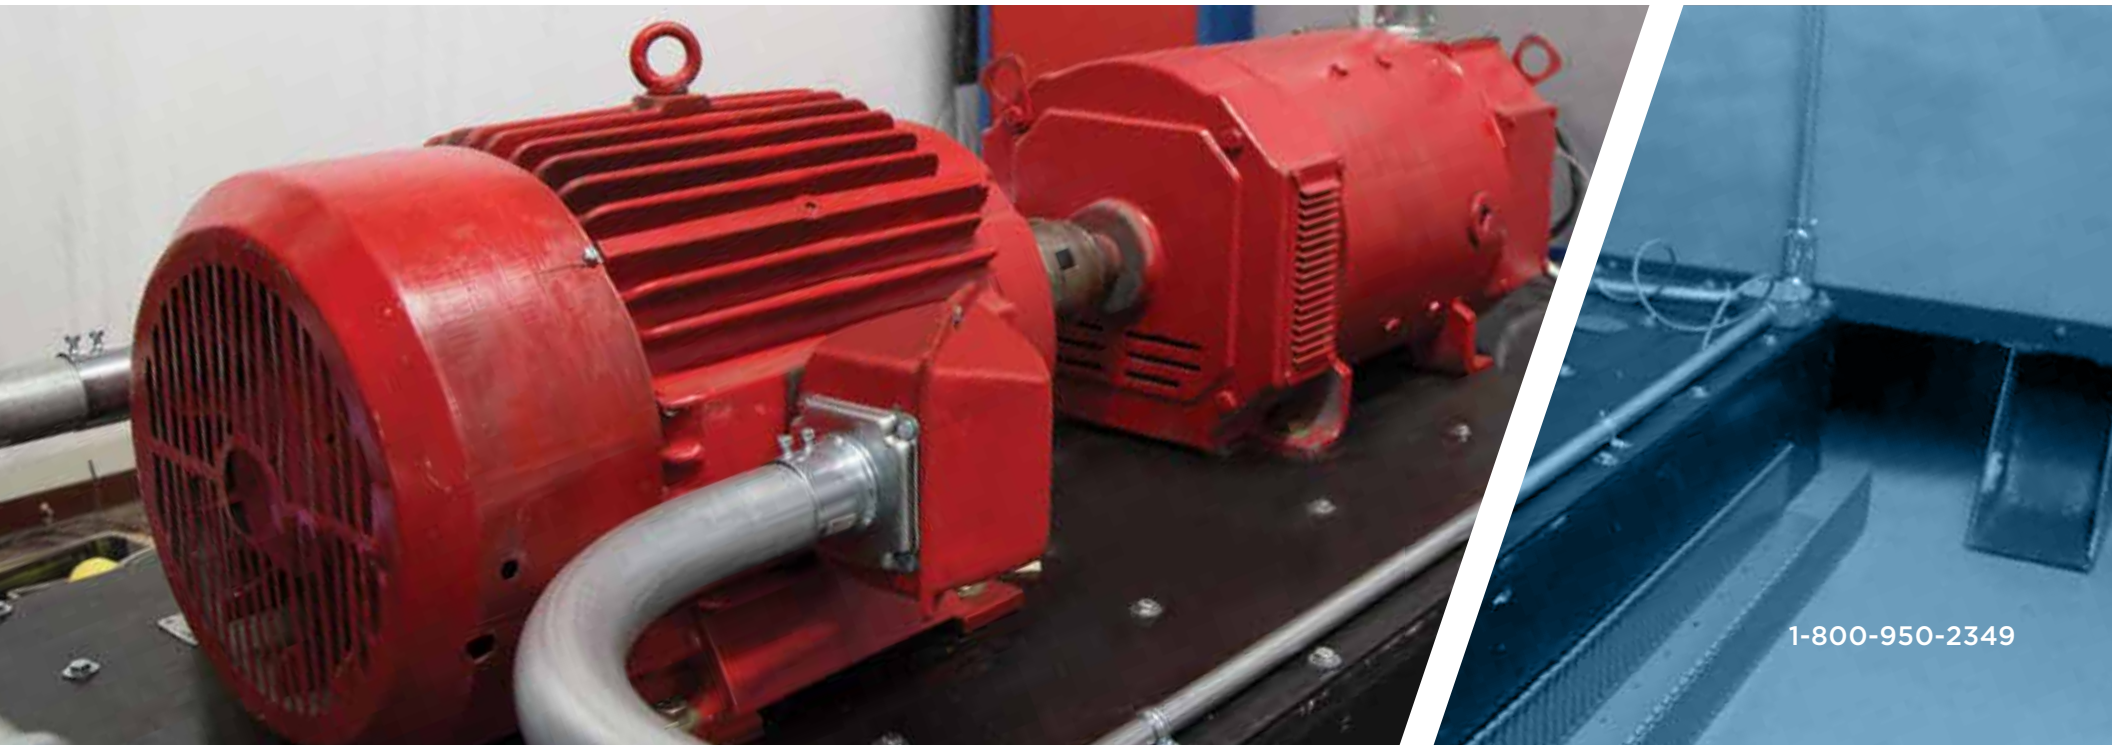

With our expanded servo system testing capabilities we can fully simulate plant running conditions to allow for precise testing of servo drives and amplifiers to analyze and repair problem areas. Having this ability allows our team to test and troubleshoot all of the components in your system at once, giving you the peace of mind that everything will work when re-installing the unit.

LOAD CENTER TESTING

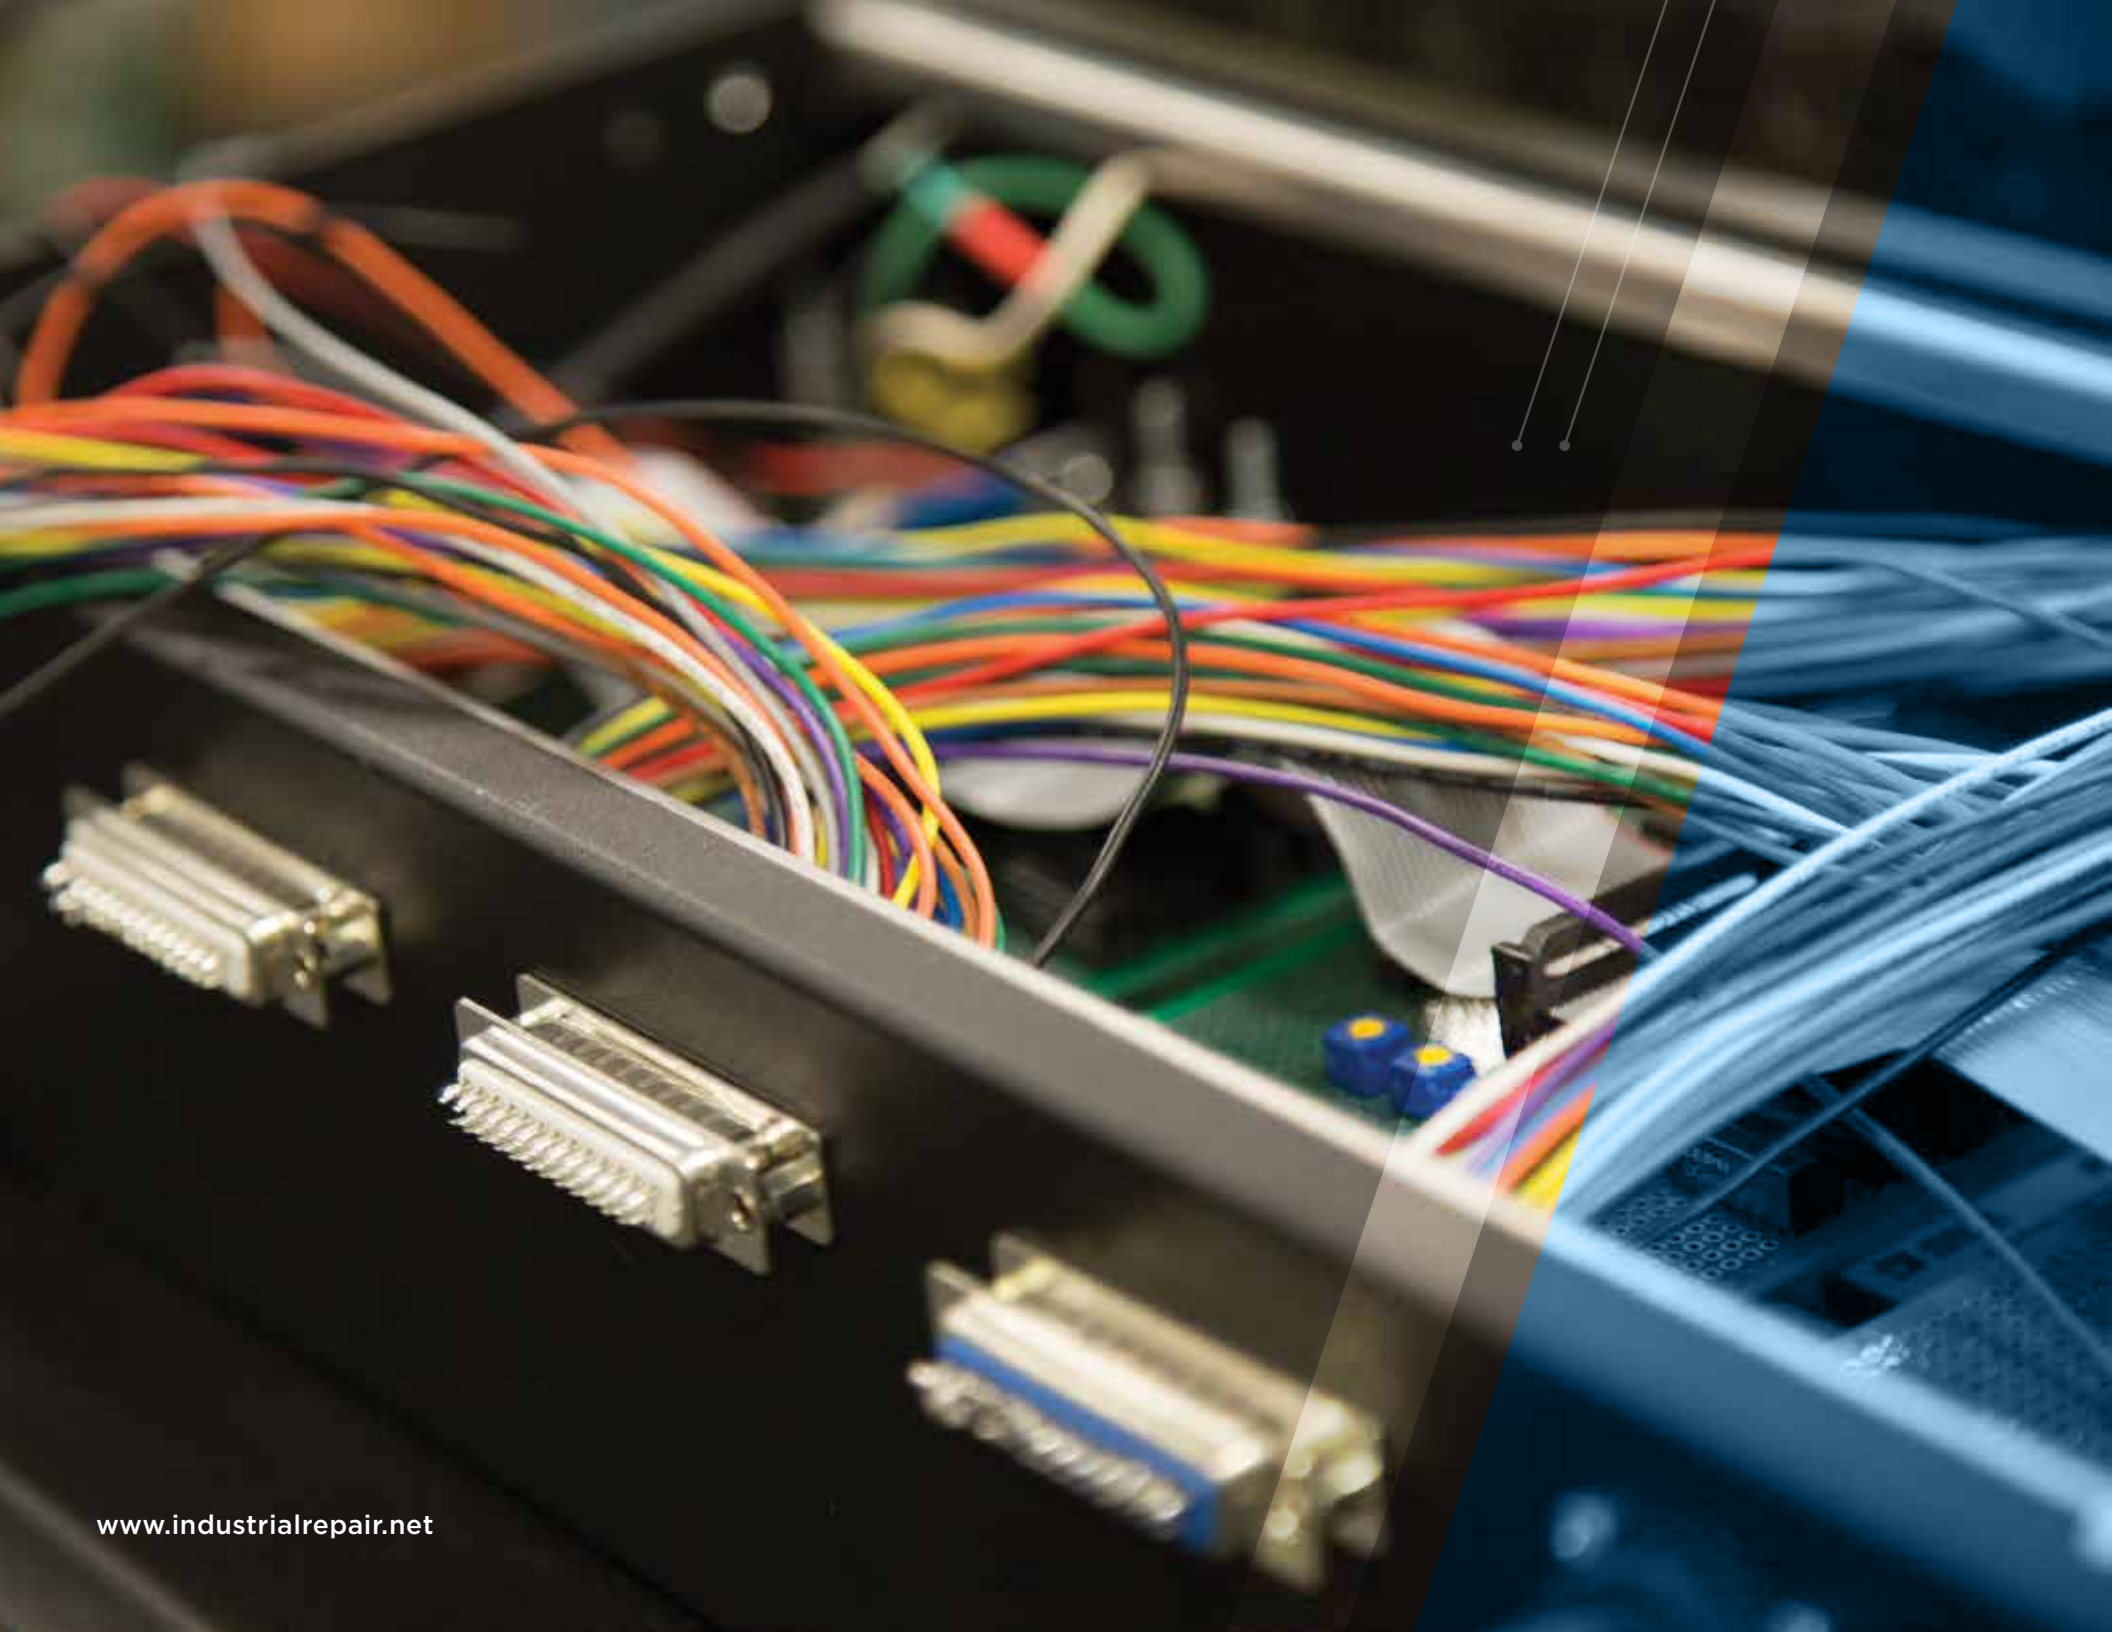

We designed and custom built a load center that gives our company the capability to fully test AC and DC drives up to 400 horsepower.

Full-load testing gives us the ability to:

- Measure AC ripple on DC supplies
- Locate hot spots and internal loose connections
- Verify that current read-out is within tolerance
- Check for full resistance testing to identify weak or faulty components on motors or drives

SERVO MOTOR LAB

Our factory trained technicians can repair and refurbish servo and spindle motors. We offer complete run-testing and alignment of feedback on devices to OEM specifications with state of the art testing equipment. We maintain the highest standards of quality control and take pride in workmanship to guarantee the best repairs.

METAL DETECTOR LAB

We provide a comprehensive repair service aimed at keeping product inspection equipment operating with maximum efficiency. Our technicians repair control modules, power supplies, and apertures.

A scheduled equipment performance verification with us, ensures parts and systems are overhauled and calibrations are fine tuned to pass internal and external inspections. Knowing compliance obligations are being met ensures that inspection equipment performs accurately with today's regulatory standards.
