

Get Your Shrink Discs and Couplings In One Day

Our EXPANDED *Rapid Response* program gives new meaning to the term *quick coupling*.

RAPID RESPONSE

- Shrink Disc locking devices for shafts up to 200 mm.
- Metal Bellows couplings from the AKD, AKN and DKN, EKN Series.
- Servo Insert Bellows from the GWE 5102, 5103, 5104 and 5112 Series.
- Order by 12 p.m. Eastern Time for next day shipping.
- Maximum order size is 10 units.

Shrink disc locking device

If you build or maintain shaft-driven equipment, you may not have the luxury of waiting weeks for your couplings to arrive. Now you don't have to wait.

The **Ringfeder Rapid Response** program makes our most popular shrink disc locking devices, metal bellows couplings and servo couplings available overnight.

The Rapid Response Program currently covers the most popular sizes from three of our product lines.

Ringfeder Shrink Disc™ locking devices use a system of tapered thrust rings, an inner pressure ring and a set of locking screws to couple a hub and shaft. When you tighten the locking screws around the circumference of the disc, the outer thrust rings are drawn together, compressing the inner rings against the hub and the hub against the shaft. The resulting shrink fit can handle extremely high forces. The Rapid Response program covers full, half and split Shrink Discs suitable for shaft diameters up to 200 mm. Maximum order for next day shipping is 10 units.

GERWAH® Metal Bellows Couplings offer backlash-free shaft connections within tight spaces. Made from stainless steel, they provide high torsional stiffness and excel at compensating for angular, axial and radial misalignment. The Rapid Response Program applies to our most commonly used metal bellows couplings—the AKD, AKN, DKN and EKN series.

GERWAH® Servo Insert Couplings. Our GWE backlash-free servo insert couplings provide vibration damping capabilities and misalignment compensation to keep your servo-driven systems running smoothly. Available torques cover a range from 0.5 to 1,920 Nm, depending on the model. Models from the GWE 5102, 5103, 5104 and 5112 Series all qualify for overnight shipping.
